MINIATURES are gaining in popularity by leaps and bounds, because they are so good, in so many ways, they can be the back-bone of the summer flower garden, for nothing gaines such a grand display of volor for weeks and months as the miniature & pom dahlias. Miniatures are so lovely for arranging, they will also win their share of blue ribbons at the flower shows. Do plant them liberally, they are easy to grow, pinch out the tops when few inches high, no staking.

We wish to emphasize that a great many of our Dahlias are of foriegn origination and new in this country, that also explains some of the queer sounding and unprenounceable names of those varieties. That that does not lessen their levilatess. We are proved of all what we like to like the group of the casely.

- victory DAY: A-Str C An enormous borry-red enctus almost as thick thru as broad. Blosson, are perfect on long strong thin stems. Everyone likes this beauty, blue ribbon, 5ft 1.00

U SE D.HLIAS AS CUT FLOWERS:

We do not believe that proper use is made of the lovely modern dahlias as cut flowers. The dahlia of today was bred not only for beauty, but for better substance, longer stems, and especially for longer lasting blossems when cut. But dahlias must be sut at the proper time and conditioned before arranging or other use. Mature blooms should be out late afternoon or night, or very early in the morning—evening preferrod. Stems should be out just as they are wanted for arranging, place immediately in deep water, leave in coolest place (porch) until morning when they are ready for what ever purpose intended. If it is necessary to shorten stems, do cut them under water.

GREATINGS: -- With our second Dahlia list, and probably our last one, as we must quit the Darfodil and Dahlia business, which we started a few years ago. This little venture has been fun, with lots and lots of hard work -- we ve made many friends over the country and many

lots of hard work--we've made many friends over the country and many of those friendships will continue.

Our Dahlia collection consists mainly of Cactus, miniatures and Poms. The few Decoratives that we list, are very fine varieties which we liked and grew for our own enjoyment, but since we have surplus tubers of those also, we are listing them this time. We list many fire new rare ones, and immany cases we have only a few tubers of the variety, as low as four or five. Since we have taken many orders loce ally, wont you please allow us to substitute if we have to. We will do so with either a similar variety or a higher priced one. We believe that we have a very fine, wide and varied collection of the best in Dahlias. Mostly we have tried to make the prices lower and attractive in order to dispose of all of our tubers.

TERMS: If interested in varieties on our list, do : send your orders right away—we will either make de-; livery now or hold the tubers for spring delivery. We will prepay all orders for \$3.00 and over this side of the Mississippi River, on all others ple se include .35¢ to help pay transportation costs. We quarantee all tubers to be true to name and with a crowing over

ALONG WITH LACH ORDER, SOMETHIES WE SEND EVALUAL.
